Program Overview

This program builds practical expertise in applying FIDIC contract principles to day-to-day construction management.

Through case studies, executive discussions, simulations, and hands-on exposure to contract administration tools, participants will develop the skills to manage FIDIC-based contracts and address issues as they arise on site.

Program Objectives

- **Understand FIDIC Contract Structure:** Grasp the roles and obligations defined under FIDIC.
- **Apply FIDIC on Site:** Translate contract clauses into day-to-day site decisions.
- **Manage Notices and Instructions:** Issue and respond to notices within contractual timeframes.
- **Address Site Issues as They Arise:** Resolve delays, variations, and disputes early.
- **Use Contract Administration Tools:** Track notices, claims, and correspondence systematically.
- **Sustain Contract Discipline on Site:** Apply documentation and administration practices long-term.

Target Audience

This program is designed for construction managers applying FIDIC contracts on site, including:

- **Construction & Site Managers** administering FIDIC contracts day to day.
- **Project Engineers & Coordinators** supporting contract administration on site.
- **Quantity Surveyors & Commercial Managers** valuing works and assessing claims.
- **Contract & Claims Administrators** preparing and responding to claims.
- **Contractors & Subcontractor Managers** executing works under FIDIC terms.
- **Owners & Employer Representatives** overseeing FIDIC-based project delivery.
- **Consultants & Contract Advisors** guiding site teams on FIDIC application.

Program Impact

Participants will leave this program with practical FIDIC administration skills. Graduates will return to their sites ready to manage FIDIC-based contracts and address issues as they arise.

Program Outline

MODULE 1: Foundations of FIDIC for Construction Managers

- Roles and obligations under FIDIC contracts
- Overview of key FIDIC clauses for site managers
- Overview of the FIDIC suite and contract types
- The construction manager's role in contract compliance
- Common pitfalls in day-to-day FIDIC administration

MODULE 2: Applying FIDIC on Site

- Translating contract clauses into site decisions
- Managing programme, progress, and delay clauses
- Applying payment and certification provisions
- Hands-on exposure to contract administration tools
- Avoiding common site-level contract errors

MODULE 3: Managing Notices and Instructions

- Issuing and responding to notices on time
- Managing instructions and variation orders
- Documenting correspondence and decisions
- Using tracking tools for notices and deadlines

MODULE 4: Addressing Site Issues as They Arise

- Identifying and responding to delays early
- Managing variations and their contractual impact
- Resolving disagreements before they escalate
- Using issue tracking and resolution tools
- Building a well-documented issue resolution record

MODULE 5: Sustaining Contract Discipline

- Maintaining consistent documentation practices
- Monitoring contractual compliance on site
- Escalating unresolved issues appropriately
- Sustaining contract discipline beyond the program
